REMARKS

Re: the attached - we have only one "bullet" to contribute:

- All the intelligence gathering capability in the world is negated unless there exists a capability to communicate that information securely and quickly. That is, a communications network is a vital portion of the intelligence business.

This contribution is apropos since the magazine has a communications and electronics emphasis.

DO NOT use this form as a RECORD of approvals, concurrences, disposals, clearances, and similar actions

EO/DDA ✓

in length

I am in the process of drafting a statement, about 600-800 words on intelligence, for the DDCI to submit to Signal Magazine. This magazine, the official journal of the Armed Forces Communications and Electronics Association, is publishing an issue in October 1981 which deals with intelligence. If any of your elements have any views on intelligence that I can use in this article, please have them to me by 31 July. I will gladly accept bullets or talking points; text is not a necessity.

If you have any questions, please call.

SA/DDCI

• all the intelligence gathering capability in the world is negated unless there exists a capability to communicate that information securely and quickly

Unclass? Yes
